POSTDOCTORAL FELLOW AT IRB BARCELONA

POSTDOCTORAL POSITION IN GLYCOGEN METABOLISM

Applications are invited for a postdoctoral position in the Metabolic Engineering and Diabetes Therapy Group at the Institute for Research in Biomedicine (IRB). The successful candidate will work on the hepatic metabolism of glycogen. The position is supported by a 3-year grant and is included in the Molecular Medicine Programme. Experience in the study of metabolism will be highly valued. Moreover, familiarity with the use of molecular and cell biology and biochemistry techniques as well as in the use of animal models of diabetes and obesity will be positively evaluated.

Our laboratory has extensive experience in the study of glucose metabolism and its alterations in diabetes. We follow a multidisciplinary approach involving a combination of several techniques, ranging from basic molecular biology and cell biology procedures to experiments *in vivo* and to the determination of the structure of key proteins by x-ray crystallography (in collaboration with members of the Structural and Computational Biology Programme of IRB).

Those interested should contact (preferably by e-mail)

Prof. Joan J. Guinovart
Institut de Recerca Biomèdica
Parc Científic de Barcelona
Josep Samitier, 1-5
08028 Barcelona, Spain

E-mail: joan.guinovart@irbbarcelona.org
Website: www.irbbarcelona.org

Applicants should send full *curriculum vitae* and the names and addresses (including e-mail) of two referees.
