POSTDOCTORAL FELLOW AT IRB BARCELONA

POSTDOCTORAL POSITION IN CHROMATIN STRUCTURE

The EBL (Experimental Bioinformatics Laboratory), as part of the Joint Research Program between the Institut for Research in Biomedicine (IRB) and the Barcelona Supercomputing Center (BSC), is seeking a postdoctoral scientist interested in the experimental characterization of chromatin structure.

CANIDATE PROFILE:

Ph.D in molecular biology, biochemistry or related sciences, with a strong background in yeast biology. Experience in genomics based methods for the analysis of chromatin structure and dynamics is essential, knowledge of standard bioinformatic techniques will be an asset.

WE OFFER:

A two year contract with a salary depending on the experience and qualifications of the applicant. Our laboratory is devoted to the characterization of chromatin regulation through a combination of computational biology and molecular biology with excellent resources and an outstanding scientific and technological environment.

HOW TO APPLY:

Applications should be addressed to Prof. Modesto Orozco (montse.soler@irbbarcelona.org) and should include a full CV, a motivation letter and the names of two potential referees.
