## POSTDOCTORAL FELLOW AT IRB BARCELONA

### POSTDOCTORAL POSITION IN THE CHROMATIN STRUCTURE AND FUNCTION LABORATORY (Dr. F. Azorín)

A postdoctoral position is available in the Chromatin Structure and Function Laboratory to study chromatin organisation and dynamics. The lab's research focuses on the epigenetic regulation of chromatin functions, using yeasts and *Drosophila* as model systems.

The position is available to start early 2012. Although not a requirement, previous experience in *Drosophila* or yeast genetics and molecular biology would be highly appreciated.

Interested candidates should send their CV and the names of two referees to:  
Dr. F. Azorín ([ferran.azorin@irbbarcelona.org](mailto:ferran.azorin@irbbarcelona.org)) and Martha Brigg ([martha.brigg@irbbarcelona.org](mailto:martha.brigg@irbbarcelona.org)).
