ENTREPRENEURSHIP PROGRAMME

ENTREPRENEURSHIP COURSE
9 Dec 2021 – 3 Feb 2022
ENABLECARES

ENABLECARES PROGRAMME

ENABLECARES is a joint initiative of four leading biomedical research institutes (IRB Barcelona, Radboudumc, CPR, SEMM) committed to supporting junior researchers in Europe strengthening their careers by providing them with high-level training on Entrepreneurship, open science and other related transferable skills.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 101006361

INTEGRATION OF ENTREPRENEURSHIP SKILLS

The ENABLECARES ENTREPRENEURSHIP TRAINING COURSE is **optimised for biomedical researchers**. This course seeks to empower junior scientists by giving them the tools to explore their potential as entrepreneurs in life science and their interest in pursuing careers in business or innovation management, thereby increasing their employability in academia or beyond.

After completing the course participants will become familiar with the process of defining a business plan and confer the skills needed to apply strategy, marketing, finance, and innovation concepts to support critical strategic decisions regarding the start of a new business.

The ENABLECARES entrepreneurship course will allow participants to:

- Acquire insights regarding strategy, marketing, finance and innovation concepts relating to the creation of a new business in high-technology markets.
- Learn to apply these concepts to analyse the challenges encountered by entrepreneurs when starting a business in a high-technology and high-service context.
- Learn to substantiate the critical decisions underlying the development of a feasible business plan.

CONTENTS & STRUCTURE

enablecares
