From Science To Business
3-14 October 2022
From Science to Business (FS2B) is a course designed by The Barcelona Institute of Science and Technology and Esade to improve entrepreneurship and innovation skills among the members of the BIST community, with the goal of fostering the development of new ventures and the creation of spin-off companies.

Researchers from other institutions are also welcome upon request and subject to availability.

1. About FS2B
Overview

Today’s global economy and businesses are facing a tremendous challenge: how to transform research -the money invested and the resources provided to research institutions- into new innovations to create new products and services that can improve the life of individuals and society as a whole.

One of the main barriers encountered is the “distance” between researchers and the business world. This distance is not usually physical, it is simply a lack of knowledge on both sides.

Minimizing this distance would, without a doubt, improve the returns to society on the money invested in R&D.

Involving the scientist behind the invention and/or researchers who decide to pursue a professional career in developing new businesses will significantly increase the odds of a successful new company.
Participants

This programme, delivered by Esade since 2008 (firstly in collaboration with ICFO and, from 2016, with BIST), is aimed at Senior and postdoctoral researchers, staff and graduating doctoral students.

This course aims to increase the speed of turning innovation and knowledge into new ventures.

The course, is designed for groups of approximately 30-35 people to ensure optimal participation, learning and faculty-to-participant ratio.
Learning objectives

The From Science to Business programme will prepare participants:

• To get acquainted with the business world, and to show how companies create value for society and for themselves: providing more, better and healthier food, a cleaner and safer environment, a higher quality of life, etc.

• To provide a framework to understand how companies work and how they create value in a competitive environment.

• To help understand the new venture creation process, and the role that science/technology plays in it.

• To show that new venture creation needs scientists and engineers, and that entrepreneurship can be an attractive career path for them.
Key takeaways

How to find and evaluate business ideas.

• Methods to differentiate between an idea and an opportunity.
• Tools to analyze the environment, the industry and the market to understand the opportunity.
• How to craft and validate a suitable business model.
• The basics of competitive strategy: how to win clients and differentiate yourself from your competitor

• Basic understanding of the interrelationship between science/technology and strategy.
• Understanding financial statements: profit and loss account, cash flow and balance sheet.
• Methods to estimate the capital requirements of the venture: the financial plan.
• Hands-on experience: working on a business opportunity and design a business model for it.

Welcome Event & Panel of Entrepreneurs

• This activity will serve as the programme kick-off. BIST will invite a selected number of entrepreneurs who will share their stories, their experiences and their vision on start-up creation with the participants.

• The purpose of this activity is to get inspired by entrepreneurs with science and technology backgrounds. We will facilitate the interaction with both, the speakers and the other participants.
Entrepreneurship

• This module will focus on two main issues in Entrepreneurship – firstly, the context, in which a scientific venture is established and operates and, secondly, the process of developing and managing a new venture.

• Module contents:
  o Understanding the process of building a science-based new venture.
  o From ‘the idea’ to ‘the opportunity’: assessing the opportunity.
  o Designing a suitable business model for the opportunity.
  o The business plan: how to prepare and use it.
Innovation & Strategy

• This module will provide a framework for understanding the company from a strategic point of view, the tools to analyze the general environment and the industry and a model for strategic management.

• Module contents:
  o Different business strategy options and the search for a competitive advantage.
  o The Industry and the Company Value Chains.
  o Key Success Factors.
  o Mechanisms for growth.
  o Science/technology and strategy interrelationship.

FACULTY TO BE INVOLVED

Prof. Dr. Xavier Ferràs
Project Workshop

• A Project Workshop will be put into practice throughout the programme so that participants will implement their learnings and will apply them to their own case studies and projects with an eminently practical approach.

• Layout of the Workshop:
  - Participants will work in teams of approximately 5 people, thus developing communication and collaboration skills between peer scientists/technologists
  - During the Workshop teams will:
    - work on the business opportunity: Market size, competitive analysis, and time (technology adoption Life Cycle)
    - design a business model (BMC) for the opportunity
    - identify the (3) most important unknowns/hypotheses on the BM and work on a validation strategy
    - estimate the time and the amount of money they would need to get to the next step (first validation round)
    - pitch their projects to receive feedback from the other participants peers and professors
  - Teams will pitch their projects to all the participants, professors, and representatives of the Centers to obtain feedback
Entrepreneurial Finance

- This module will be dedicated to one of the most challenging and difficult activities that an entrepreneur must embark upon: understanding the financial needs of the venture.

- Module contents:
  - Understanding the financial statements: profit and loss account, cash flow and balance sheet.
  - Methods to estimate the capital requirements of the venture.
  - Preparation of the Financial Plan.
  - Financial resources for an innovative new venture: business angels and venture capital.

FACULTY TO BE INVOLVED

Prof. Gloria Batllori
Cases

• Throughout the programme, technology and science-related businesses and start-ups will be discussed.

• ESADE will work with science-based entrepreneurs in order to explore the possibility to incorporate parts of their experiences into the course. This will allow the students to see examples of entrepreneurship specifically related to science.
3. Faculty
Faculty

Prof. Dr. Jordi Vinaixa
Programme Director

Associate Professor, Department of Strategy and General management. PhD in Chemistry (University of Barcelona) and MBA (ESADE).

His main subjects of interest are Innovation and Technology based Entrepreneurship.

He did research in chemistry at the Universities of Barcelona and of Sussex, and has previous professional experience as a manager in the chemical, education, cultural and service industries.

Academic Director of the ESADE courses for the KIC InnoEnergy. Running From Science to Business and other science and technological related courses and activities since 2005.
Faculty to be involved

Prof. Dr. Xavier Ferràs

PhD in Economics and Business from UB and MBA from ESADE and Telecommunications Engineer from UPC.

Executive Director, ESADE Custom Programmes.

Former Dean of the Faculty of Business and Communication at the University of Vic.

Until 2012, he was Director of the ACC10 Centre for Business Innovation (Catalan Agency for Competitiveness), and was responsible for technology transfer policies, R&D and development of clusters in Catalonia.
Faculty to be involved

Prof. Gloria Batllori

Gloria Batllori is Lecturer in the Department of Finance & Accounting at ESADE Business School since 2000. She has been Executive Director of International Customs for ESADE Executive Education, as well as Executive Director and Associate Dean of the MBA FT Program.

Her areas of interest and expertise are business and strategy valuation, and corporate finance. She maintains strong links to the world of strategic consulting and financial advice, particularly in the area of investments. She is also a certified financial analyst (CFA). She has more recently co-founded the company, Hollymontt - a financial gaming ecosystem that aims to universalize experiences and knowledge for all people who have never had the opportunity or interest in investing.
Lluís Pareras

Founding partner at Invivo Ventures FCR, a venture capital fund investing in life sciences and healthcare (€40M, first closing). Degree and PhD in Medicine, specialist in Neurosurgery, and Global Executive MBA (IESE). He founded the “Innovation and entrepreneurship program” at the Barcelona Medical Association (CoMB), where he has been coaching entrepreneurs and he has founded and directed the Healthcare Investment Forums since 2009.

He has been an entrepreneur himself in the healthcare space and raised capital from investors. Deeply involved in the innovation ecosystem, he is a member and advisor of many healthcare innovation organizations such as Biocat (Board of Trustees), CIMTI, BarcelonaActiva Mentoring Program, Generalitat de Catalunya-CASOST and HEALTHIO among others. Author of numerous books in the field of innovation, venture capital and healthcare, such as “Innovation and Entrepreneurship in Healthcare”, published internationally. In the academic space, he has been a teacher in several business schools about healthcare innovation and venture capital. He remains as the Director of Healthequity, SCR, a venture capital fund focused in early-stage companies in the healthcare sector, where he led the investment strategy and transaction processes of the different portfolio companies. Member of the Board of Directors of different life-sciences companies including Healthequity’s investments: Versantis, n-life Therapeutics and Minoryx Therapeutics. (TWITTER: @pareras)
4. About Esade
Esade has delivered the course *From Science to Business* to BIST staff since 2008, initially collaborating with ICFO and from 2016 with the Barcelona Institute of Science and Technology.

Since 2010 Esade also delivers the course for the KIC InnoEnergy in collaboration with the European Institute of Innovation & Technology (EIT) - International teams of MSc and PhD students - 15 editions - More than 375 participants from 20 nationalities.
About Esade

International PRESTIGE
Esade is one of the top-10 business schools in Europe according to the main international rankings.

RECOGNIZED by Companies
Esade the 1st (most highly valued) international business school by companies.

INNOVATIVE with Regards to Learning
Esade’s learning model, based on the development of managerial skills and competencies, is a pioneer in Europe.

COMMITTED to Society
Esade is the second most highly ranked business school in the world for the corporate social approach and ethics of its MBA. Its Institute for Social Innovation is the cornerstone of our social commitment.

Creates LINKS with People
Esade is the business school with the second largest alumni association in Europe (with more than 40,000 alumni).

HIGH QUALITY, Relevant Learning
Esade’s commitment is to provide high quality, relevant learning for companies that translates into results.

Top-Nontech FACULTY with Business Experience
Esade has a widely recognized faculty, that on top of developing high-quality research, has also relevant business experience.
About Esade

• Esade and CERN are collaborating in ATTRACT (http://www.attract-eu.org/), a new, open, pan-EU initiative to accelerate the development of detector and imaging technologies for market – through a process of co-innovation with other labs, SMEs, industry and universities.

The aim: to work with scientists, students, entrepreneurs and investors to invent new services and products, and attract new investment to the sector.

A project is already in going on at CERN’s Geneva campus, in collaboration with Esade and Aalto.

• Esade and CERN are also developing the Thinking the Unknown programme, for executive profiles.
5. About BIST
The Barcelona Institute of Science and Technology

BIST is a leading institution of multidisciplinary research encompassing seven Catalan research centres of excellence. By fostering collaboration among members of its diverse scientific community, BIST aims to play a leading role in pushing the frontiers of science while becoming a global reference for training outstanding research talent.
FROM RESEARCH TO MARKET: Transforming Basic Science into 45 Spinoffs

• 45 startups created, 39 active
• Health / Energy and Sustainability / Computing and Communications
• 2019-2022: 15 new start-ups
