

Organised by

INSTITUTE
FOR RESEARCH
IN BIOMEDICINE

Sponsored by

The Institute for Research in Biomedicine (IRB Barcelona) is an international research centre devoted to offering biomedical solutions to cure cancer and other diseases linked to aging.

The activities of the BBVA Foundation in the field of biomedicine are centered on the promotion of research projects and support of initiatives such as the Oncology Research Programme at the Institute for Research in Biomedicine or the promotion of specialised training courses and leading international meetings.

Barcelona BioMed Conferences bring together about 20 speakers selected from among leading international researchers in a highly focused think-tank atmosphere. A limited number of participants, selected on the basis of their scientific experience, are invited to join. Registration is free.
