

RE: Request for letter of recommendation for

Dear Professor,

I am applying for a PhD Position at the Institute for Research in Biomedicine in Barcelona and I have been asked to forward this letter to you requesting a letter of recommendation. I would be grateful if you would give them your opinion about my suitability as a potential PhD student. Please indicate our relation and evaluate me as an applicant according to the following criteria: theoretical knowledge; technical proficiency; interaction with colleagues; adaptability and flexibility; motivation and commitment; ability to work independently; and communication skills.

Please include an overall rating, from 1 (lowest) to 10 (highest) of all the students you have encountered and indicate the time period in which you interacted with me as a student and in which capacity (as a teacher, advisor, employer, etc.)

The letter should be sent directly via email to the following address: phd@irbbarcelona.org before 15 February, 2017.

Thank you in advance for your help.

Yours sincerely,

Prospective PhD Student
